INDICATORS OF SUBSTANCE USE IN MASSACHUSETTS

Alcohol and other drug use and abuse are difficult to observe and measure directly. When asked, few individuals report that their use of alcohol or other drugs is either abusive or related to problems in their lives. The consequences of abuse, however, may be observed in disease, death, arrest, and admissions to drug and alcohol treatment programs. The relative prevalence of alcoholism and drug abuse, therefore, can be estimated from a variety of indicators. ...

Measurements based on indicator data are most useful for estimating the relative prevalence and change in prevalence rather than the absolute magnitude of the problem. Each indicator may be flawed. Hospital discharge data may be incomplete in some communities. Data on the contribution of alcohol and drugs to morbidity and mortality may only reflect the most obvious cases. Causes of death attributable to substance use may go unreported or unobserved. Arrest data can reflect increases and decreases in patrol time, variable attention to specific offenses, and reporting that may be incomplete. Although individual indicators have different weaknesses and biases, when viewed together, they form a mosaic that outlines the nature and extent of drug and alcohol problems in communities, suggest changes in magnitude over time, and identify differences from location to location.

The Department of Public Health, Division of Substance Abuse Services and Health and Addictions Research, Inc. have developed a database of indicators reflecting drug and alcohol problems. Data collected over several years was averaged to form more reliable and stable measures. The indicators are not used to make estimates of absolute prevalence. Comparisons between communities, however, suggest differences in relative prevalence. While drug and alcohol problems impact communities of all sizes, larger communities tend to have higher figures on most indicators.

Individuals who are addicted to drugs and alcohol often experience a variety of physical and psychological problems. These problems can be both short-term and long-term, and they can have a significant impact on the individual's overall health and well-being.

One of the most common physical problems associated with substance abuse is liver disease. The liver is responsible for filtering toxins from the blood, and when it is damaged by alcohol or drugs, it can no longer perform its normal functions. This can lead to a variety of liver problems, including cirrhosis, fatty liver disease, and liver failure. Other physical problems associated with substance abuse include heart disease, high blood pressure, and respiratory problems. These problems can be both short-term and long-term, and they can have a significant impact on the individual's overall health and well-being.

In addition to physical problems, substance abuse can also have a significant impact on an individual's psychological health. Substance abuse can lead to a variety of mental health problems, including depression, anxiety, and schizophrenia. These problems can be both short-term and long-term, and they can have a significant impact on the individual's overall health and well-being. Substance abuse can also lead to a variety of behavioral problems, including aggression, impulsivity, and poor decision-making. These problems can be both short-term and long-term, and they can have a significant impact on the individual's overall health and well-being.

The Department of Health and Human Services (HHS) has a variety of programs and services that are designed to help individuals who are addicted to drugs and alcohol. These programs and services include counseling, medication-assisted treatment, and support groups. HHS also has a variety of resources that are available to individuals who are looking for help, including the National Helpline (1-800-662-4357) and the Substance Abuse and Mental Health Services Administration (SAMHSA) website (www.samhsa.gov).

COSTS OF ALCOHOL AND DRUG ABUSE

ALCOHOL COSTS

- o 406,000 Massachusetts women and men need treatment for alcoholism or drug abuse.
- o Massachusetts residents drink 2.7% of alcohol consumed in the U.S.
- o National cost of alcohol-related economic losses is \$137 billion.
- o Massachusetts share of alcohol-related economic costs is \$3.7 billion.

AIDS

- o 23% of Massachusetts AIDS cases reported to date are related to IV drug use (n=646).
- o 30% of AIDS cases reported between 5/1/89 and 10/31/89 were IVDU related (N=114).
- o 47% of women with AIDS have a history of IV drug use.
- o According to NASADAD, the annual estimated cost of caring for an AIDS patient is \$100,000.

CRIME

- o 13,476 commitments were made to houses of correction and state penal institutions in 1987.
 - o 40% of house of correction court commitments and 40% of state penal court commitments in 1988 were self-reported drug users.
 - o The FY 1990 annual cost for an inmate in a state penal institution is \$23,368.

B. Contents: Hospital patient discharge records with diagnoses (ICD-9 codes) related to either alcohol or drug use. Records were chosen for inclusion in the substance use indicator dataset if any of 238 substance use related codes were listed as principal or associated diagnoses. It is possible for a record to have more than one substance use related diagnosis. Discharge data were not submitted by the following hospitals during the years noted:

Boston City	1986 & 1987
Cambridge	1986
Quincy City	1986
Union (Lynn)	1986 & 1987
Lynn	1985 (partial) & 1986

- B. Contents: Admissions to substance abuse treatment agencies funded by the Division of Substance Abuse Services. Beginning in Fiscal Year (FY) 1988, the Division of Alcoholism (DOA) and the Division of Drug Rehabilitation (DDR) were merged into the Division of Substance Abuse Services (DSAS). Data for FY 1986 and 1987 combine the DOA and DDR client databases while FY 1988 and 1989 data are from the DSAS client database.
- C. Years Reported: FY 1986 - FY 1989

IV. Weekly AA/NA Meetings

- A. Source: Alcoholics Anonymous and Narcotics Anonymous
Meeting Lists
Eastern Mass.: Central Service Committee
Western Mass.: Western Mass. Intergroup Office
- B. Contents: Number of weekly AA and NA meetings in each town. Includes only meetings listed in the meeting lists. Many closed and twelve step meetings are not included in the meeting lists.
- C. Years Reported: 1986 - 1988. No information for Western Massachusetts in 1987.

V. Liquor Licenses

- A. Source: Massachusetts Retail Liquor Licensee Directory
Massachusetts Alcohol Beverages Control
Commission
- B. Contents: Number of liquor licenses issued to
establishments located in each town. Includes
licenses issued to (a) package stores, (b)
pharmacies, (c) restaurants, (d) taverns, (e)
general on premises, (f) hotels, and (g) clubs
.. for (a) all alcoholic beverages, (b) wines and
malt beverages only, and (c) malt beverages
only.
- C. Years Reported: 1986, 1987, and 1989. No directory was
published in 1988.

VI. District Court Filings

- A. Source: Annual Report of the Massachusetts Trial Court
Office of the Chief Administrative Justice
- B. Contents: Criminal complaints filed in the District Court
Department and in the Boston Municipal Court
Department for operating under the influence
(OUI) and narcotics. Filings and dispositions
represent the movement of cases through the
court departments and provide an index of the
activities of these courts. There are a total
of 69 courts under the jurisdiction of the
District Court Department. District court
figures are reported for the town in which the
court is located although the actual complaints
and litigants may have originated in other
towns.
- C. Years Reported: 1986 - 1988

VII. Uniform Crime Report

- A. Source: Uniform Crime Reporting Program
U. S. Department of Justice
Federal Bureau of Investigation
- B. Contents: Number of arrests reported to the Uniform Crime Reporting Program. Arrest data are supplied by city, county, and state law enforcement agencies. Substance use indicators include (a) arrests for sale and manufacturing of controlled substances, (b) possession of controlled substances, (c) liquor law violations, and (d) driving under the influence of liquor (DUIL). Only figures reported by local city and town law enforcement agencies are included in this report. Data from county sheriff departments and the state police are not included.
- C. Years Reported: 1986 - 1988

PLEASE NOTE: Indicators may not be mutually exclusive. For example, the same person may be arrested for DUIL (included in UCR data) and treated for cocaine in the substance abuse treatment system. Such a person would be included in both indicators.

INDICATORS OF SUBSTANCE USE IN MASSACHUSETTS

- o 21,000 hospital discharges and nearly 2,000 deaths related to alcohol and drug abuse
 - o 96,000 admissions to publicly-funded drug and alcohol treatment services
 - o 1,800 AA and NA meetings each week
 - o 9,700 liquor licenses issued each year
 - o 35,000 district court filings related to narcotics charges
 - o 17,000 arrests for sale/manufacturing and possession of controlled substances

SUBSTANCE USE INDICATORS BY SIZE OF COMMUNITY

- o Communities of all sizes and characteristics are impacted by both direct and indirect consequences of substance use.
 - o Indicator rates are generally higher in larger communities. The 6 communities over 90,000 had the highest rates on most measures.
 - o The highest rate of alcohol-related liver disease (including cirrhosis) was found among communities between 50,000 and 90,000 in population.
 - o The rate of substance abuse related deaths in communities over 90,000 was nearly twice that in all other size of community categories. A similar pattern exists for substance abuse treatment admissions.
 - o The number of liquor licenses issued per 100,000 population was highest among communities under 10,000 in population. Many of these communities are in resort and recreational areas.

SUBSTANCE USE INDICATORS IN CITIES OVER 90,000 IN POPULATION

- o The six cities in Massachusetts with a projected population in 1990 of over 90,000 are BOSTON, WORCESTER, SPRINGFIELD, BROCKTON, NEW BEDFORD, and LOWELL.
 - o Among these cities, SPRINGFIELD had the highest rate of admissions to substance abuse treatment per 100,000 population.
 - o The highest substance abuse related death rate was in BOSTON, followed closely by WORCESTER and LOWELL.
 - o WORCESTER had the highest rate of substance use related hospital cases. The rates for BOSTON and SPRINGFIELD are under-reported due to a lack of data from Boston City Hospital and New England Medical Center in Boston and Bay State Medical Center in Springfield.
 - o The number of liquor licenses issued per 100,000 population was highest for NEW BEDFORD, followed by BOSTON and WORCESTER.
 - o BOSTON and BROCKTON had the highest rates of weekly self-help group meetings.

TRENDS IN STATEWIDE SUBSTANCE USE INDICATORS

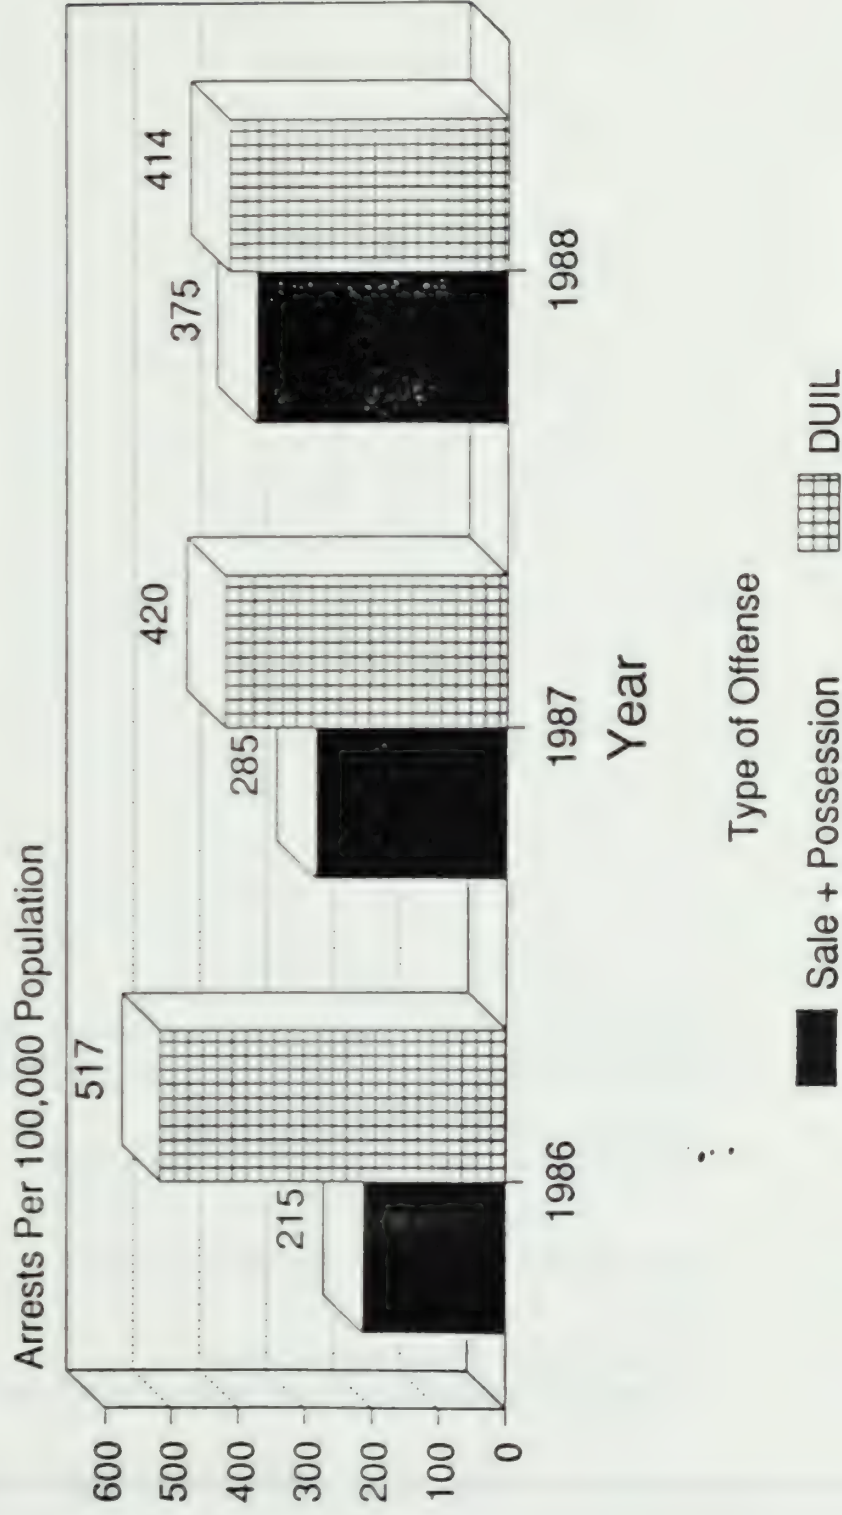

- o Most statewide indicator totals and rates per 100,000 population were stable over the years covered by this analysis.
 - o DISTRICT COURT NARCOTICS COMPLAINTS rose from a rate of 526 per 100,000 population in 1986 to 743 per 100,000 in 1988. Over the same time period, operating under the influence (OUI) rates fell, from 720 per 100,000 to 658 per 100,000.
 - o ARRESTS FOR SALE/MANUFACTURING and POSSESSION of controlled substances rose from a rate of 215 per 100,000 population in 1986 to 375 per 100,000 in 1988. DRIVING UNDER THE INFLUENCE OF LIQUOR ARRESTS fell from a rate of 517 per 100,000 in 1986 to 414 per 100,000 in 1988.
 - o First and second offender DRUNK DRIVING PROGRAM ADMISSIONS have shown trends that parallel the court and arrest data.
